Wireless Communication Solutions from the Leader in Workplace Two-way Radio Systems

- **Unique, innovative products not available from any other manufacturer**
- **Engineered and designed to work together as a complete system (increases responsiveness, safety and flexibility in your workplace)**
- **Compatible with virtually any existing business band radio system (easy add-on)**
- **No monthly airtime charges or service fees**
- **Proud to be an American Manufacturer**

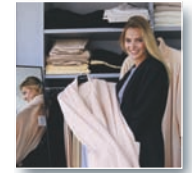

RITRON...the right wireless solutionssm

The Company

Founded in 1977, Ritron is a privately held U.S. based corporation located north of Indianapolis in Carmel, Indiana. Ritron has been recognized as a world leader in the engineering, design and manufacture of cost-effective, high performance two-way radio communication products and systems.

Ritron products improve the operation, safety, and profitability of any organization by providing instant voice communication throughout the workplace. *Keeping people connectedsm*

A Complete Line Of Wireless Products To Enhance The Security and Productivity of Your Facility

NEW!

Portables Communicate!

A Ritron radio-equipped staff is a more productive and a more efficient staff. Rugged, small, lightweight portable radios also increase security with instant communication at the push-of-a-button.

Base Station/Wireless Intercom Monitor!

Fixed location 2-way radio, desktop or wall-mount capable. Never needs recharging, it's AC powered. *Always Ready...Always There ...Always On!*SM

Shopper's Assist Respond!

Allows the customer to summon radio-equipped personnel whenever assistance is needed. Unit sends a pre-recorded voice message at the push-of-a-button. Retailer benefits from more efficient use of manpower and quicker customer response. Annoying overhead paging is eliminated. Additionally, increased utilization of existing 2-way radio system increases the retailer's return-on-investment.

OutPost® Callbox Protect!

Put communication right where it's needed...wireless technology installs quickly and easily *without costly trenching, monthly charges or air-time fees*. Provides long-range (miles, not feet) communication between radio-equipped personnel and the OutPost® callbox. Increased utilization of existing systems by allowing system-access by even the most remote locations. Improves security and safety of the facility *without* additional personnel.

GateGuard® Feature Control!

KEEP GATED AREAS SECURE!
Built-in GateGuard feature provides dual-purpose use of the OutPost® radio callbox —enables both long-range (miles, not feet) wireless voice intercom *and* remote control of gates from a portable or base station radio.

Quick Talk™ Voice Alarm Reporter Alert!

It's like being in two places at once!
Cost-effective, 24/7 wireless monitoring of any switch or sensor *without* the cost of additional manpower. When the switch changes state (opens or closes), unit sends a pre-recorded voice alert over your two-way radio. Ideal for power fail, generator ON, liquid level alarm, intrusion/tamper alarm, PIR sensors or smoke alarms. Battery powered, lasts 10,000 transmissions on 6 AA cells.

Quick Talk™ vS Wireless Vehicle Detection System Detect!

With the addition of a magnetometer, the Quick Talk Reporter provides 24/7 detection and alert of a variety of moving vehicles.

Radio Repeaters Extend!

Extend the range, coverage, and penetration of your two-way radio system. Provides high performance with rugged dependability...*all at an economical price.*

OEM RF Transceivers Connect!

Small footprint, reliable and low-cost ...programmable RF transceivers for original equipment manufacturers (OEM) or custom wireless applications. High performance specifications, superior reliability and flexible ordering options allows easy RF transceiver integration by the OEM. Markets served include federal, state and local government, US military, transportation, industrial and commercial.

NEW!

TeleSwitch™ Wireless Switch Control Activate!

Allows long-range, wireless, remote-control of up to 2 relays (switches) using touch-tone signaling. Use either a touch-tone equipped portable, mobile or base station to remotely control: pumps, fans, machinery, gates, lights, strobes, sirens.

NEW!

RadioNexus™ RoIP Interoperability!

Simple, low-cost interoperability solution. RadioNexus connects to an IP router or radio gateway and allows Land Mobile Radios (LMR) to communicate over an IP network to *other networked devices* e.g desktop PC, laptop, IP phone, cellular phone, or other two-way radios regardless of frequency band, or signaling format.

Cross-Band Interoperability!

Even when not connected to a router or radio gateway, the RadioNexus still solves interoperability problems. When connected in a back-to-back configuration VHF and UHF radios can now talk to each other seamlessly, even through radio repeaters. It's also the perfect solution for difficult to cover applications like tunnels and basements.

Accessories

- Microphone

- Holsters

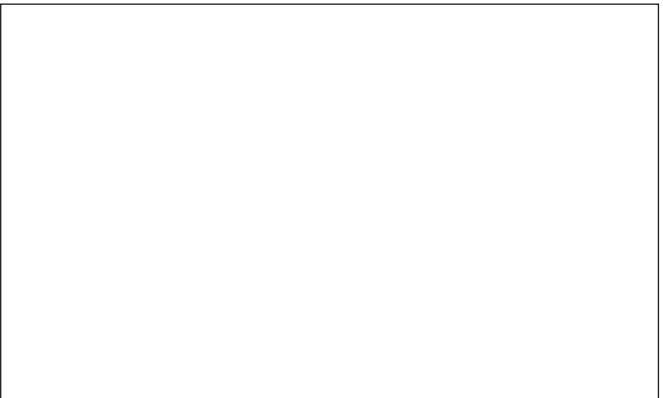

- Chargers

- Earsets

- Headsets
